DETAILED ACTION

Receipt is acknowledged of applicant's Status Inquiry filed 06/09/04, Request for Extension of Time and Amendment filed 02/04/04.

Allowable subject matter

Claims 48, 49 and 60 are allowable.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Refer to rejections in the office action dated 08/04/03.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 1615

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Refer to rejection in the office action dated 08/04/03.

Response to Arguments

Applicant's arguments filed 02/04/04 have been fully considered but they are not persuasive. Original rejections are maintained, except the 102(b) rejection by EP 0 856 313 A 1 has been withdrawn in view of applicant's amendment and argument dated 02/04/04.

Applicant argues that all of the Eudragit type polymers taught in EPA '313 are charged, thus, the skilled artisan, having read EPA '313 in its entirety would not have deviated from the teachings of EPA '313 to use a neutral copolymer as there is no motivation provided by the teachings of EPA '313 to use a neutral copolymer. Contrary to the applicant's argument, the broad teaching of multi-layer membrane comprising film-forming, water insoluble synthetic polymers is generic, and therefore, permits the use of any water-insoluble polymer including neutral copolymer. Eudragit type polymers are just exemplary, evident by the use of the phrase "such as" (see EPA '313, page 4, lines 42-44). See MPEP § 2173.05(d).

Applicant shows unexpected result by presenting data comparing pharmacokinetic parameters between the claimed invention and Cardizem CD (equivalent of the product of EPA '313). However, the data does not show which composition is being tested. Applicants' claims comprise several independent claims claiming different formulations with respect to percent amounts and ingredients being

Art Unit: 1615

used. Accordingly, the showing is insufficient to overcome the rejection of claims 1-47, 50-59 and 61-110 based upon EPA '313 as set forth in the last Office action.

Pertinent Arts

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hendrickson et al., and Barry et al. are cited as of interest. Barry is cited for the teachings of a sustained release tablet comprising a core of at least one excipient and at least one pharmacologically active substance, including diltiazem; a coating comprising water-insoluble neutral copolymer (see abstract, column 3, column 7, lines 13-15, and claim 1).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
